Dear George,
 How are you? Here we are at my grandma and grandpa's country house and we're having a great time! The house is old, but very beautiful. It's got three floors and six bedrooms. All the bedrooms have got a beautiful fireplace and their own bathroom. It's a bit cold and windy here, but the sun is shining. In the morning, my grandpa makes us breakfast, then we all go for a little walk to the nearby village. Sometimes, we feed the ducks in the river. After lunch at the cottage, we play board games like Monopoly or Scrabble, or we talk. My grandpa is very funny and tells very good stories! At the moment, my grandma is decorating the house with balloons. It's my brother's birthday tomorrow. We'll probably have a little party for him! See you soon.

Subject: Holiday plans!

Dear Brian,

Thanks for your email. Let me tell you about our plans for our summer holiday!

In June, I'm going to Sochi with my family. We are going to fly to Adler-Sochi International Airport and we are going to stay at the Zhemchuzhina Hotel. Then, I am going to see some films

at the international film festival with my mother. My father and my brother are going to go fishing.

We are going to meet in the evenings and we are going to eat together in the colourful street cafes and restaurants. I'll send you a postcard and tell you all about it.

A strange story

When I was 7 years old, my family left the big city and moved to the countryside. I was very excited because our new house was near a beautiful forest.

One day I decided to go for a walk in the forest but I lost my way. I tried to get back but I just went deeper into the forest. I looked around me and started calling for help, but no one heard me. I was confused and scared because it was almost dark, so I sat under a tree and began to cry. Suddenly I heard someone coming. It was a boy of my age. "Hi", he said. "I'm Philip. What's the matter?" I told him that I was lost. "Don't worry", Philip said. "I live near here. I know the forest well". We walked and talked until we were out of the forest. Philip said goodbye and left before I could thank him.

When I got home my mum was talking to a policeman. They were both very upset. "Oh, Tom, thank goodness you're OK!" my mum said when she saw me. "I lost my way in the forest, mum, but I'm fine now. I'm so sorry", I said. "You were lucky, young man", the policeman said. "Never play alone in that forest, it's too dangerous. 8 years ago, a boy named Philip Mac Mann lost his way in that same forest and never came back".

I didn't say a word. I wanted to tell them about the boy who helped me but I was afraid they wouldn't believe me. Did a ghost help me? I couldn't sleep that night, or the next. I never saw Philip again and I never went back to the forest!

36. Where did Tom's family move to?

Sun Shines On Fun Run

On 12th June, a 'Fun Run' took place in the town of Sunnyfield. A group of sixteen-year-old students from the local high school came up with the idea and over 500 people of all ages took part.

Luckily, it was a sunny day. Everyone had fun running, walking or skate-boarding the 10-mile distance. Thanks to the event, 0,346 was raised for the charity 'Cancer Care'.

Suzie Hamilton, one of the students who organised the run, said, "We wanted to do something useful for others and this seemed the most fun thing to do."

The local headmaster was so proud, he decided to make the event part of the school's yearly calendar.

41. Who planned the event?
42. How many people took part?
43. What was the weather like during the 'run'?
44. How far did they have to go?
45. What happened as a result of the event?

№2 Read the following text and mark the statements as T (true), F (false) or DS (doesn't say). (повышенный уровень)

Since school is the place where you spend a good part of your day, it's a good idea to have a few rules regarding classroom etiquette in mind.

To begin with, it's always nice to greet your teacher and the other students when you walk into the classroom. If you go to class after the lesson has already started, it's polite to apologise to your teacher. During the lesson, you need to respect your classmates, as well as your teacher. That means you should pay attention to others when they're speaking to the whole class, and you shouldn't talk to those next to you while the teacher is trying to explain something.

Of course, all this doesn't mean that the classroom environment needs to be strict and boring. Your teacher will certainly appreciate it if you have something funny to share with the rest of the class. Also, if you have any fresh and creative ideas about a class project or trip, your teacher will be more than willing to hear about them. After all, teachers run out of ideas too! Remember, teachers were once students themselves, and they know very well that every now and then, the class needs to do something different from their usual routine and, above all, they know that learning should be fun!

1 You should never talk when entering the class.

2 If you are late, you need to bring a note from your parents.

3 You should never talk in the classroom.

4 It's OK to tell a joke in the classroom.

5 You should feel free to make any suggestions related to school matters to your teacher.

№2 Read the following text and choose the correct answers (A, B, C, D). (базовый уровень)

As a teenager, my brother Al used to invent little things as a pastime. After the gadget phase, he started making toy aeroplanes out of wood or plastic. His creations were quite impressive for someone so young. His room was always full of books about famous pilots and jet aeroplanes that he read again and again. His dream was to sell his model aeroplanes in his own shop one day, so he was determined to learn all about flying, and even designed all his models on a 3-D computer programme, before he built them.

Neither of my parents opposed Al's decision. They both believed that people should be keen on their jobs, but our father wanted him to get a university degree first. Our mother thought that a good education was necessary, especially because she had doubts about if he could earn a good living with his aeroplanes. On the other hand, she couldn't see how becoming a lawyer or a doctor for example, would help Al with the job he wanted to do.

When Al finished school, he finally decided to get a degree in architecture. During his studies, Al continued his hobby in his spare time, but also got involved in other things. He played football for a while, volunteered at the school's library, and joined the drama club; though he soon decided that acting wasn't for him.

As soon as Al graduated, he and another dozen students took a tour of Europe. The highlight of Al's trip was France. He even considered moving there for a short time to improve his skills in French, but he wanted to return home to prove to himself that he could succeed as a businessman. Three years later, Al accomplished his goal, and today, he is so successful, that he has five shops in our city and is planning to open more around the country. And, who knows, maybe one day his model airplanes will be famous around the world!

1 When Al was young, he wanted to be a(n)

- A pilot
- B shop owner
- C computer designer
- D inventor

2 Al's mother believed that

- A it wasn't important for Al to get a good education.
- B a good education would help Al with his career.
- C Al might not earn enough money from the job he wanted to do.
- D Al would make a very good lawyer.

3 While Al was at university, he

- A continued to build model airplanes.
- B got a job as an architect.
- C trained to be a professional actor.
- D worked at the university library.

4 What did Al do soon after graduation?

- A He lived in France for a while.
- B He opened up his own business.

- C He did some travelling.
- D He learned how to speak French.

5 Al wants to open

- A another shop.

№2 Read the following text and choose the correct answers (A, B, C, D). (базовый уровень)

As a teenager, my brother Al used to invent little things as a pastime. After the gadget phase, he started making toy aeroplanes out of wood or plastic. His creations were quite impressive for someone so young. His room was always full of books about famous pilots and jet aeroplanes that he read again and again. His dream was to sell his model aeroplanes in his own shop one day, so he was determined to learn all about flying, and even designed all his models on a 3-D computer programme, before he built them.

Neither of my parents opposed Al's decision. They both believed that people should be keen on their jobs, but our father wanted him to get a university degree first. Our mother thought that a good education was necessary, especially because she had doubts about if he could earn a good living with his aeroplanes. On the other hand, she couldn't see how becoming a lawyer or a doctor for example, would help Al with the job he wanted to do.

When Al finished school, he finally decided to get a degree in architecture. During his studies, Al continued his hobby in his spare time, but also got involved in other things. He played football for a while, volunteered at the school's library, and joined the drama club; though he soon decided that acting wasn't for him.

As soon as Al graduated, he and another dozen students took a tour of Europe. The highlight of Al's trip was France. He even considered moving there for a short time to improve his skills in French, but he wanted to return home to prove to himself that he could succeed as a businessman. Three years later, Al accomplished his goal, and today, he is so successful, that he

has five shops in our city and is planning to open more around the country. And, who knows, maybe one day his model airplanes will be famous around the world!

1 When Al was young, he wanted to be a(n)

- A inventor
- B shop owner
- C computer designer
- D pilot

2 Al's mother believed that

- A it wasn't important for Al to get a good education.
- B Al might not earn enough money from the job he wanted to do.
- C a good education would help Al with his career.
- D Al would make a very good lawyer.

3 While Al was at university, he

- A trained to be a professional actor.
- B got a job as an architect.
- C continued to build model aeroplanes.
- D worked at the university library.

4 What did Al do soon after graduation?

- A He lived in France for a while.
- B He did some travelling.
- C He opened up his own business.
- D He learned how to speak French.

5 Al wants to open

- A another shop.
- B five shops in his town
- C shops in different countries
- D shops in different cities.

Being one of the most popular sites in the world, the Eiffel Tower attracts hundreds of thousands of tourists every year. In fact, the structure, received its two hundredth millionth guest in 2002. Located on the Champs de Mars by the Seine River, visitors can make their way to the top and admire the breathtaking view of Paris.

The Tower was the inspiration of French engineer Gustave Eiffel. A very famous personality in his time, Eiffel had also done important work for the internal structure of another famous monument, the Statue of Liberty in the USA. Work on the Eiffel Tower began in 1887 and lasted until 1889, when the building was opened to the public during the Paris World Exposition. Until 1930 and the construction of the Chrysler Building in New York, the Tower remained the highest structure in the world.

Many people, especially artists, criticised the structure saying that this distasteful structure did not fit in with the beauty of Paris. One of these critics was the French writer Guy de Maupassant, who ate at one of the tower's restaurants almost every day, because it was the only place in Paris from where the tower was not visible, and so he wouldn't have to see it!

A lot of effort and money go into keeping the Tower in good condition. Every seven years, sixty metric tons of paint are used to repaint it. Different shades of the same colour are used on the top and darker ones on the bottom in order for the building to have an unvarying appearance.

The effects of global warming are becoming more and more noticeable with the passing of the years. The number of floods, storms and heatwaves has increased as a result of carbon dioxide (CO₂) and other greenhouse gases that do not allow the sun's heat to escape the Earth's atmosphere. However, a simple and quite possibly effective idea has been suggested as a way to help lessen the consequences of climate change. Professor Steven Chu, the US Energy Secretary and a Nobel Prize winner, suggests that painting our rooftops white will help the Earth's temperature to drop. The idea is that if enough surfaces — rooftops, pavements, roads — are painted white, more sunlight will reflect off these surfaces and go back into space. This will help cool our planet down.

According to scientists, if rooftops and roads were painted white it would reduce the amount of CO₂ by billions of tons. This would be the same as taking every car in the world off the streets for 11 years. Not only this, but homes with white rooftops and cars that are painted white wouldn't absorb so much heat from the sun. This means that they would be cooler and people wouldn't have to turn on their air conditioners as much. Consequently, we would save more energy and reduce the amount of CO₂ released in the atmosphere. Although the idea of white rooftops has been generally welcomed by the scientific and environmental communities, there appear to be a few problems. One of these is the fact that the colour white would be too bright if it was painted on too many large surfaces. Another concern is that keeping the white surfaces in good condition for a long period of time would be too expensive.

Pessimists feel that though painting rooftops and pavements in light colours is good in theory, it is just a very small step to take towards reducing the Earth's temperature. What we must remember though, is that there is not one solution to global warming. It's the combination of different methods that will help our planet get back on its feet.

1 There has been an increase in the amount of greenhouse gases in recent years.....

2 Professor Chu suggests painting every large surface on the Earth white.....

3 Buildings with white rooftops don't need air conditioning.....

4 Professor Chu's suggestion has been accepted by many experts.....

5 Some people feel that painting surfaces white will not be enough to solve the problem of global warming.....

(повышенный уровень)**

The effects of global warming are becoming more and more noticeable with the passing of the years. The number of floods, storms and heatwaves has increased as a result of carbon dioxide (CO₂) and other greenhouse gases that do not allow the sun's heat to escape the Earth's atmosphere. However, a simple and quite possibly effective idea has been suggested as a way to help lessen the consequences of climate change. Professor Steven Chu, the US Energy Secretary and a Nobel Prize winner, suggests that painting our rooftops white will help the Earth's temperature to drop. The idea is that if enough surfaces — rooftops, pavements, roads — are painted white, more sunlight will reflect off these surfaces and go back into space. This will help cool our planet down.

According to scientists, if rooftops and roads were painted white it would reduce the amount of CO₂ by billions of tons. This would be the same as taking every car in the world off the streets for 11 years. Not only this, but homes with white rooftops and cars that are painted white wouldn't absorb so much heat from the sun. This means that they would be cooler and people wouldn't have to turn on their air conditioners as much. Consequently, we would save more energy and reduce the amount of CO₂ released in the atmosphere. Although the idea of white rooftops has been generally welcomed by the scientific and environmental communities, there appear to be a few problems. One of these is the fact that the colour white would be too

bright if it was painted on too many large surfaces. Another concern is that keeping the white surfaces in good condition for a long period of time would be too expensive.

Pessimists feel that though painting rooftops and pavements in light colours is good in theory, it is just a very small step to take towards reducing the Earth's temperature. What we must remember though, is that there is not one solution to global warming. It's the combination of different methods that will help our planet get back on its feet.

1 There has been an increase in the amount of greenhouse gases in recent years.....

2 Some people feel that painting surfaces white will not be enough to solve the problem of global warming.....

3 Buildings with white rooftops don't need air conditioning.....

4 Professor Chu's suggestion has been accepted by many experts.....

5 Professor Chu suggests painting every large surface on the Earth white.....

Micro homes room for just one!

1.....

How would you feel about living in a house that was only 2.6m long by 2.6m wide by 2.6m high? Well, in Europe some people are doing just that. Micro compact ('much') homes are very small homes that are no bigger than the size of a small room!

2.....

So how do you fit not just a sleeping and living area, but also a study and bathing area into a space that is only 2.6m³? Well, in much homes, each area has more than one uses, because you can change the place of the seats, beds and kitchen appliances. So, the dining area (which is also the study area) becomes a sleeping space by sliding the dining table into a wall. And the entrance way doubles as a bathroom-the front door becomes the shower door!

3.....

The company that makes these tiny homes says that they designed them to solve the difficulty many Europeans have in getting their own home. Too many people cannot afford accommodation in Europe and these low-cost homes are perfect for someone who wants a place where they can live for a short time.

4.....

The first people to try living in much homes were university students. Students love them because although small, they are very modern with flat screen TVs and comfortable furniture.

5.....

So what's 'micro living' like? Well, you have to be a very neat, tidy and organized person, because in order to do one thing, you have to first finish another and put everything away. Also, the lack of space means you can't have many personal items. But if you want a cheap, cosy, modern space that you can call your own, a micro home may be for you

Nature's joke? - the strange and wonderful PLATYPUS

The platypus is a strange little creature found only in Australia. When the first platypus was sent to Europe in the 19th century, the scientists who examined it just could not believe their eyes. They believed the platypus was a joke, **1**They thought some fun-loving Australian had put the feet and nose of a duck onto the body of a rat, **2**).....

But platypuses are real, **3**) Platypuses have a nose like a duck, webbed feet like a duck, soft brown fur on their body and a long, flat tail like a beaver. As if that weren't strange enough, even though they are mammals (which means they feed their babies milk), platypuses don't give birth to live babies **4**)! No wonder scientists couldn't decide for a very long time if platypuses were birds, reptiles or mammals.

But the platypus has even more wonderful characteristics. Platypuses find their food in rivers by using electric fields. And, if they are in danger, male platypuses have sharp hooks on their feet **5**)It's no surprise then, that this special, shy little animal is one of Australia's most famous creatures. A picture of the platypus appears on the Australian 20 cent coin. Australians are very proud of their unique platypus.

1

For thousands of years human beings have dreamt of cheating death and the aging process. In their fantasy world, they live forever and remain young and beautiful in old age. Well, it may sound incredible, but there are some scientists who believe that mankind will soon have the technology to make this dream come true!

2.....

Sounds like science fiction? Maybe. But remember that technology gives us the ability to do things today that people living only a few decades ago would have considered magic. Therefore, there is no reason why we shouldn't believe that experts will make all this possible.

3

Some scientists believe that medical technology is moving so fast that by the end of this century, advanced anti-aging technologies will be available, and it will let people live for hundreds or maybe even thousands of years if they want to. Of course few people would want to live

- D THE NEGATIVE SIDE
- E NUMBERS DON'T LIE
- F DON'T QUESTION IT

to 1000 if, they had to spend hundreds of years looking and feeling like a 90-year-old. But some researchers think medicine will be able to keep people looking and feeling as beautiful and fit at 500 years old as they were at the age of 25!

4

Naturally, the possibility of living 50 long raises many problems if people don't die, how will the Earth cope when it gets so overcrowded? Many people believe that scientists should not develop anti-aging technology, and that they should let nature take its course as it has been doing for millions of years.

5

Of course, most scientists believe that humans will never possess such technology. But if living to 1000 becomes possible, do you think it would be a dream ... or a nightmare? And, if you had the choice, would you choose to live forever?

1

For thousands of years human beings have dreamt of cheating death and the aging process. In their fantasy world, they live forever and remain young and beautiful in old age. Well, it may sound incredible, but there are some scientists who believe that mankind will soon have the technology to make this dream come true!

2.....

Sounds like science fiction? Maybe. But remember that technology gives us the ability to do things today that people living only a few decades ago would have considered magic. Therefore, there is no reason why we shouldn't believe that experts will make all this possible.

3

Some scientists believe that medical technology is moving so fast that by the end of this century, advanced anti-aging technologies will be available, and it will let people live for hundreds or maybe even thousands of years if they want to. Of course few people would want to live

to 1000 if, they had to spend hundreds of years looking and feeling like a 90-year-old. But some researchers think medicine will be able to keep people looking and feeling as beautiful and fit at 500 years old as they were at the age of 25!

4

Naturally, the possibility of living 50 long raises many problems if people don't die, how will the Earth cope when it gets so overcrowded? Many people believe that scientists should not develop anti-aging technology, and that they should let nature take its course as it has been doing for millions of years.

5

Of course, most scientists believe that humans will never possess such technology. But if living to 1000 becomes possible, do you think it would be a dream ... or a nightmare? And, if you had the choice, would you choose to live forever?
